

## Announcements

### The second edition of the biography of Donald E. Bently

We are thrilled to announce that the Second Edition of "Don Bently Through the Eyes of Others" is finally available. This bound edition was painstakingly assembled in honor of Don's 70th birthday by his long-time friend and associate, Dr. Agnes Muszynska. A collection of stories and anecdotes about Don written by fellow scientists, friends and business associates, it is an insightful and often humorous look into the achievements and personality of a giant of a man and the history of Bently Nevada. The second edition has a beautiful, photo-montage dustcover designed to protect the elegant, but plain, cover. It contains a number of anecdotes and several pages of color photographs, not included in the first edition, which we were barely able to squeeze into this edition. A third edi-

tion is planned, based on the stories readers are reminded of as they finish reading this book.

The second edition can be purchased for \$29.95 plus tax, including shipping and handling. Contact Customer Service at (702) 782-9211 or by fax at (702) 782-9259 to order by credit card, or send check or money order in U.S. Dollars (including local sales tax) to Bently Nevada Corporation, 1617 Water Street, Minden, Nevada 89423, USA, Attn: Customer Service. ■

### Announcing a new Sales and Service operation in India

Bently Nevada's direct operation in India began in January of this year. Bently Nevada India succeeds Sherman International Pvt. Ltd., our representative in India for the past seventeen years. Our operation in India is consistent with our policy of direct interaction with our customers, so we can understand and meet your needs. Bently Nevada India offices will initially be located in Delhi, Bombay, Hyderabad and Baroda.

In May 1996, we opened a Machinery Diagnostics Office in Baroda, Gujarat State, India. Hitesh Shah, a Mechanical Engineer with twelve years of experience, will be available to help you with machinery diagnostics, alignment and balancing. Mr. Shah graduated in 1984 from the University of Baroda, Baroda, India and has extensive experience in the petrochemical industry. ■
